

FUND OBJECTIVE:

The Element Flexible Fund aims to achieve a steady growth of capital and income for investors. The fund is actively managed and has been designed to operate as flexibly as possible within the constraints of the South African market. The Element Flexible Fund is Element Investment Managers' "best view" on domestic asset allocation, combined with individual instrument selection based on bottom-up research conducted by our in-house research team. Element Investment Managers signed the United Nations Principles for Responsible Investment (PRI) in May 2006. In signing the PRI, we have committed to adopt and implement them where consistent with our fiduciary responsibilities. We believe that this improves our ability to meet commitments to investors as well as better align our investment activities with the broader interests of society. Element Investment Managers is the first South African investment manager to sign the PRI.

SUITABLE FOR INVESTORS WHO:

- Have a moderate risk profile with a medium to long term investment time horizon
- Have low income requirements
- Need capital growth at low risk of capital loss
- Seek inflation- beating returns with limited downside risk

March 2009	8.19	5.33	2.86
September 2009	5.96	3.91	2.05

The Element Flexible Fund declares a distribution half yearly.

STATUTORY INFORMATION

Figures quoted are from Element Investment Managers, for the period ended October 2009, for a lump sum investment, using NAV-NAV prices with income distributions reinvested. Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS prices are calculated on a net asset value basis which is the total value of all assets in the portfolio including any income accrual and less all permissible deductions from the portfolio. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of participatory interests apply to these portfolios and are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the company/scheme. Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. The funds are valued daily at 15h00. The portfolios may be closed. Element Unit Trusts Limited is a full member of the Association for Savings & Investment SA (ASISA).

*The Element Flexible Fund Class A has a Total Expense Ratio (TER) of 1.73% p.a. This means 1.73% of the average Net Asset Value of the portfolio was incurred as charges, levies and fees. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.
