The Fraters Earth Equity Fund is an actively managed, domestic general equity fund that aims to provide investors with the opportunity to achieve long-term capital appreciation growth with a moderate level of income. The fund uses its presence to promote awareness of corporate responsibility performance measurements, including environmental management, social responsibility, economic empowerment and corporate governance. This is achieved through constructive engagement with management of the companies in which the fund is invested.

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit trusts are traded at ruling prices and can engage in scrip lending and borrowing. Different classes of units may apply to these portfolios and are subject to different fees and charges. Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions (brokerage, Marketable Securities Tax, VAT, auditor's fees, bank charges, trustee and custodian fees, and the annual management fee) from the portfolio, divided by the number of units in issue. A schedule of fees, charges and maximum commissions is available on request from Fraters. Commission and incentives may be paid, and if so, are included in the overall costs. Portfolios may be closed. Forward pricing is used. Fraters' portfolios are valued daily at 3pm. Instructions must reach Fraters before 3pm to ensure same day value. Fraters is a member of the Association of Collective Investments.
